Health Net's Preventive Screening Guidelines

GUIDELINES FOR CHILDREN AND ADULTS

*Coverage for
every stage of life™*

Stay up to date with your health and the health of your family. Use this guide to help remind you to schedule well-care visits with your family doctor. Note that the guidelines are refreshed often, and may change. Therefore, you should always follow the care and advice of your doctor.

Also note that this information is not medical advice and does not show exact benefit coverage. Please check your plan's benefit language for coverage limits and exclusions.

¹These guidelines may change. Please speak with your doctor.

²Doctor should follow proper series and current guidelines by the Centers for Disease Control and Prevention (CDC), US Preventive Services Task Force (USPSTF), and American Academy of Pediatrics (AAP).

³Routine health exams, counseling and education for children and adolescents should include measuring the patient's height, weight and blood pressure. Exams should also include body mass index (BMI), along with vision and hearing tests. Counseling and education could include, but are not limited to:

- Contraception/family planning
- Critical congenital heart defect, heart health
- Dental health
- Developmental/behavioral assessment
- Injury/violence prevention
- Mental health, e.g., depression/eating disorders
- Nutrition/exercise
- Sexually transmitted infections (STIs) and HIV screening
- Substance abuse, e.g., alcohol and drug abuse prevention
- Tobacco use and smoking cessation
- Tuberculosis (TB) screening
- Weight management

⁴Routine health exams, counseling and education for adults should include measuring the patient's height, weight, blood pressure, body mass index (BMI), vision and hearing tests, depression, and screening for alcohol or drug use. Recommendations vary based on history and risk factors. Counseling and education could include:

- Cancer screenings, e.g., lung cancer screening and BRCA risk assessment
- Contraception/prepregnancy
- Dental health
- Drug prevention/Cessation
- Family planning
- Heart health, electrocardiogram (ECG) screening
- Injury/violence prevention
- Maternity planning
- Menopause
- Mental health, e.g., depression/eating disorders
- Nutrition/exercise
- Sexual practices, sexually transmitted infections (STIs) and HIV screening
- Substance abuse, e.g., alcohol and drug abuse prevention
- Tobacco use and smoking cessation
- Tuberculosis (TB) screening
- Weight management
